

NAZAR DAŞCI

Industrial Engineering Student | Data Analytics
dascinazar8@gmail.com | İzmir, Türkiye

PROFESSIONAL SUMMARY

I am an Industrial Engineering student at Yaşar University (expected graduation: 2027) with a strong interest in data analytics, process improvement, and problem solving. During my internship at SOCAR STAR Refinery, I worked on a real industrial problem, analyzing and cleaning maintenance data in Excel and identifying improvement opportunities. Alongside my coursework in probability, statistics, simulation, and optimization and my working knowledge of Python (NumPy), I enjoy analytical thinking, teamwork, and learning new things. I aim to take responsibility in real projects and turn data into clear, actionable decisions while developing my technical and professional skills.

EDUCATION

Yaşar University – B.Sc. in Industrial Engineering 2023 – 2027 (expected)

Language of instruction: English

Relevant Coursework: Probability for Engineers, Statistics for Engineers, Deterministic and Stochastic Operations Research, Linear Algebra, Algorithms and Computation, Object-Oriented Programming, System Simulation, Mathematical Programming and Applications, Network Science and Applications, Quality Assurance and Reliability, Generative AI for Engineering Applications, Supply Chain Planning and Optimization

EXPERIENCE

SOCAR STAR Refinery – Maintenance Planning Intern August 2026 – September 2026

- Analyzed predictive and corrective maintenance data in a real industrial project.
- Cleaned, filtered, and matched maintenance records in Microsoft Excel to support comparison and evaluation of the data.
- Used historical maintenance data to estimate maintenance durations and evaluate maintenance strategies.
- Observed operations across Maintenance Planning, Reliability, Process Control and Automation, and Integrity departments.
- Presented findings and solution proposals to the team, strengthening technical communication skills.

SCA – Social Project Management Intern September 2025 – October 2025

- Gained hands-on experience in data analytics and machine learning fundamentals through Artificial Intelligence and Data Science training.
- Contributed to planning, process management, and team coordination in project management activities.
- Studied data protection, digital rights, and legal compliance through an Information Technology Law course.

PROJECTS AND COMPETITIONS

CMS Case Analysis Competition – Team Project 2nd Place

- Conducted process analysis and problem definition on a real business case and proposed data-driven solutions.

SKILLS

Programming and Analysis: Python (NumPy, Google Colab), Microsoft Excel (data cleaning, filtering, matching)

Optimization and Simulation: LINGO, CPLEX, Arena

Other Tools: Microsoft Office (Word, PowerPoint), Miro, Canva

Soft Skills: Analytical Thinking, Problem Solving, Critical Thinking, Teamwork, Communication

Languages: English (Professional), German (Beginner)

ADDITIONAL EXPERIENCE

Part-Time Sales Associate 2023 – 2026

- Supported customers in product selection and purchasing, tracked inventory, and maintained product displays.

Industrial Engineering Social Responsibility Club – Member 2023 – 2025

- Took part in community service projects and helped plan and run social events as part of a team.
